

Briar Chemicals makes products intended to protect a wide range of cereals, ensure good harvests despite challenging climate conditions, and prevent disease outbreaks in cattle and sheep. The company also makes products of key importance for the leather, textile and plastics industries.

Briar Chemicals pays special attention to the regulations of COMAH (Control of Major Accident Hazards). The company's efforts in the areas of safety, health, environmental protection and quality are integral parts of its business activities, as is reflected in the following voluntary commitments:

- Ensure health and safety
- Minimise effects on the environment
- Ensure that neighbours are not disturbed
- Meet customer requirements

Briar Chemicals strictly follows international quality and environmental management standards like ISO 9001 and ISO 14001. As an independent manufacturer, Briar Chemicals remains true to its principle of building good public relations through comprehensive external communications programmes. Briar Chemicals is a member of the British Chemical Industries Association (CIA) and the European Chemical Industry Council (CEFIC). The company also follows the guidelines of the Responsible Care Program. It has its own power supply and waste treatment systems, so that Briar Chemicals can supply its plants with energy independently and contribute to environmental protection at the same time.
